INFINITY BIBLE CODE
PRINCIPLES OF OPERATION

1. The Infinity Bible Code operates most accurately with the King James Version. It will be less accurate when trying to use other Bible versions because modern versions have been "edited" in order for publishing houses to be able to copyright their version, since no one has the authority to copyright the Word of God.

2. Each letter of the alphabet has a numerical value, whether the language is Hebrew, Greek, English, etc.

3. The number of a word can be obtained by adding together the values of the letters of the word.

4. Each Bible chapter has a number.

5. There are 1189 chapters in the Bible, with 929 in the Old Testament (OT) and 260 in the New Testament (NT).

6. When looking at a Bible chapter that has the same numerical value of a word, the Bible chapter will have information in it about the word. This also works for a person's name.

7. For example, the Hebrew word for "rod" contains the letters Mem, Teth, He, and the sum of the three letters' numerical values (40+9+5) totals 54. This means the Hebrew word for "rod" has the value of 54. The 54th chapter of the OT is Exodus 4 and it is the story about Moses' rod! Is it a miracle or is it God's divine order illustrated?

8. The English word "rod" has a number also. It is 90+60+4 = 154. Reference the Excel file: "IBC-English Alphabet Calc" for converting between English letters and numbers. Basically, the first nine letters A-I equate to numbers 1-9, the next nine letters J-R equate to 10-90, and the remaining letters S-Z equate to 100-800. This letter-number conversion method should work for other languages also (except for Greek, it is slightly different). The 154th chapter of the OT is Deuteronomy 1. In this chapter Moses and the Red Sea are mentioned and recall that Moses used a rod to part the Red Sea.

9. Another example: suppose a word or a name has a numerical value of 100, then its match is the 100th chapter of the OT (Leviticus 10). It will also have a match in the 100th chapter of the NT (Acts 11).

10. The OT and the NT match, even though the OT is larger than the NT. The way it works is "wrapping", which is to overlay the NT over the OT.

    NT chapters 1-260 = OT chapters 1-260
    NT chapters 1-260 = OT chapters 261-520
    NT chapters 1-260 = OT chapters 521-780
    NT chapters 1-260 = OT chapters 781-929 <u>plus</u> OT chapters 1-111
    NT chapters 1-260 = OT chapters 112-372
    NT chapters 1-260 = OT chapters 373-633 (etc.)

    This illustrates the principle of "wrapping" and it can be applied to all applicable chapters.

11. Example: a word with a value of 100 can also be looked up in the 200th, 300th, 400th, etc. chapters of the OT and in the 200th, 300th (260+40), 400th (260+140), etc. chapters of the NT.

12. Not only do Bible chapters match together, so do books of the Bible. There are 66 books in the Bible, with 39 in the OT and 27 in the NT. The Apocrypha books are not included because they are not the very word of God and are not authorized to be in the Holy Bible. However, some of the Apocrypha are considered to be accurate historical reference books about biblical events.

13. Chapter-book match example, the 66 books of the Bible match up with the 66 chapters of Isaiah.

INFINITY BIBLE CODE
PRINCIPLES OF OPERATION

14. Another example: Numbers is the 4th book of the OT and it matches with the 4th book of the NT, which is John. The book of John contains more numbers than other books of the NT.

15. Another example: the first seven chapters of the Bible match the first seven books. If a student will master the first seven chapters and the first seven books, then the rest of the Bible is more easily understood because the Bible is a pattern of the first seven, a type of "menorah" code.

16. Other examples -
    - Exodus 15 and Revelation 15 both share the song of Moses.
    - Genesis 1 and John 1 both have "In the beginning" and other creation words such as "light".
    - Matthew chapters 1-28 match the first 28 books of the Bible.
    - Revelation 22 chapters X 3 = 66 books of the Bible.
    - Genesis 40 and Matthew (40th book of Bible) have "PHAR" in the words Pharaoh and Pharisee.
    - The 50 chapters of Genesis plus the first 16 chapters of Exodus match the 66 books of the Bible.
    - The 22 Hebrew letters of Psalm 119 match the 22 chapters of Revelation.

17. Another example: in Matthew 27 Pilate washes his hands, in Genesis 27 Jacob disguises his hands, in Daniel 5 (27th OT book) the fingers of a mysterious hand come forth, and in Revelation 13 (27th NT book) the mark of the beast is put on the right hand.

18. Occasionally a Hebrew word is looked up in a chapter with its corresponding number in Hebrew and there appears to be no mention of that word. Why? Well, there are other Hebrew words also with the same numerical value and they may have more mention in that chapter than the other Hebrew word. The Hebrew lexicon, for example, lists five different words with a value of 25: cheva, daka, dakka, kah, and koh. Consider this when researching, whether in Hebrew, Greek, or other language.

19. There is also higher-order number matching: a 1 can match a 10, a 2 can match a 20, and a 1 can match both a 10 and a 100, etc. Ezekiel 1 and Ezekiel 10 both have 4-faced cherubims or creatures. In Acts 11 (100th chapter of NT) it discusses four categories of beasts and an angel.

20. Another example: a 3 can match 3^2 or 3^3, etc. Genesis 3, Genesis 9, and Genesis 27 all contain the subject of beguilement or subtlety and the consequence of it.

21. Another example: Genesis chapters 9, 19, 29, 39, & 49 all deal with sexual sin / lust / beguilement.

22. Many times the Bible will have "shadow" chapters. These are chapters right before or right after the main chapter of interest and will have some of the same content as the chapter of interest. Researching the shadow chapters will lead to additional revelation that may not otherwise be available.

23. Example: the number seven means the completion of a cycle. Biblically, at the end, God's servants are redeemed or claimed as His. In Revelation 7 there is the sealing of the Father's name in the forehead of His servants. In Revelation 14 there is also the sealing. One would conclude that there is a forehead sealing in Revelation 21, but there isn't. It appears in the next chapter, the shadow chapter Revelation 22: "and his name *shall be* in their foreheads."

24. Adam lived 930 years and then passed away. The 930th chapter of the Bible is Matthew 1 and it introduces Jesus, who comes forth as the "2nd Adam".

25. Bible chapters match the years of past, present, and future. Reference the Excel file: "IBC-English Alphabet Calc" and study the table with columns of OT/NT Bible chapters that match together and also the year that they match. The basis is presented as follows:

26. In 1986, J.R. Church published a book titled: Hidden Prophecies in the Psalms. In it he presents the revelation that Psalms matches recent history, beginning with the 1900s. (Psalm 1 = 1901, etc.)

27. After studying and confirming Church's revelation about the book of Psalms, Al Neal expanded the study and discovered that while Psalms 1-150 match the years 1901-2050, the book of Proverbs also matches the 21st century, specifically the years 2001-2031.   From this baseline, the rest of the Bible chapters could be matched up with years.   In this case the study was limited to the years 1900-2024 for brevity sake.

28. The following table is a selection of a particular 16 year span in order to illustrate the match-ups:

	Bible Chapter No.	Column 1 Note 1	Column 2 Note 2	Column 3 Note 3	Column 4 Note 4	Column 5 Note 5
Year	OT / NT	OT ch. 58-73	OT ch. 318-333	OT ch. 578-593	OT ch. 629-643	NT ch. 58-73
2000	578 / 58	Exodus 8	2 Kings 5	Psalm 100	--	Luke 14
2001	579 / 59	Exodus 9	2 Kings 6	Psalm 101	Proverbs 1	Luke 15
2002	580 / 60	Exodus 10	2 Kings 7	Psalm 102	Proverbs 2	Luke 16
2003	581 / 61	Exodus 11	2 Kings 8	Psalm 103	Proverbs 3	Luke 17
2004	582 / 62	Exodus 12	2 Kings 9	Psalm 104	Proverbs 4	Luke 18
2005	583 / 63	Exodus 13	2 Kings 10	Psalm 105	Proverbs 5	Luke 19
2006	584 / 64	Exodus 14	2 Kings 11	Psalm 106	Proverbs 6	Luke 20
2007	585 / 65	Exodus 15	2 Kings 12	Psalm 107	Proverbs 7	Luke 21
2008	586 / 66	Exodus 16	2 Kings 13	Psalm 108	Proverbs 8	Luke 22
2009	587 / 67	Exodus 17	2 Kings 14	Psalm 109	Proverbs 9	Luke 23
2010	588 / 68	Exodus 18	2 Kings 15	Psalm 110	Proverbs 10	Luke 24
2011	589 / 69	Exodus 19	2 Kings 16	Psalm 111	Proverbs 11	John 1
2012	590 / 70	Exodus 20	2 Kings 17	Psalm 112	Proverbs 12	John 2
2013	591 / 71	Exodus 21	2 Kings 18	Psalm 113	Proverbs 13	John 3
2014	592 / 72	Exodus 22	2 Kings 19	Psalm 114	Proverbs 14	John 4
2015	593 / 73	Exodus 23	2 Kings 20	Psalm 115	Proverbs 15	John 5

Notes
- 0 All 5 columns match across the board, as follows:
- 1 OT Bible chapters 58-73 match NT chapters 58-73
- 2 OT Bible chapters 318-333 match NT chapters 58-73 (318 – 260 = 58 and 333 - 260 = 73)
- 3 Psalms = 19th book of Bible = the 1900s, with Psalm 1 = year 1901, Psalm 101 = year 2001 = 579th ch.
- 4 Proverbs = 20th book of Bible = the 2000s, with Proverbs 1 = year 2001 = 629th chapter, etc.
- 5 NT Bible chapter 58 = 578 - 260 - 260, NT Bible chapter 59 = 579 - 260 - 260, etc.

Again, the complete table of matching years is contained in the Excel file: "IBC-English Alphabet Calc".

A few examples of this study: Revelation 13 = 1933 U.S. gold confiscation by FDR, Revelation 19 white horse = 1939 German invasion of Poland, Proverbs 1 = 9-11-2001 World Trade Center attack.

29. Another researcher, Toby Anderson, presented the following revelation:

> Genesis 1 = 929 B.C.
>   thru
> Malachi 4 = 1 B.C.
>   and
> Matthew 1 = 1 A.D.
>   thru
> Revelation 22 = 260 A.D.

To go forward and back in time do the wraps of scripture.   It is a different time scale than the table above but it is worth studying to see what additional revelation comes forth.
